

WE MAKE YOUR IDEAS SHINE!

ACHTE[®]

Frameless, slimline, economical

WE BUILD TRANSPARENT LIGHT BOXES TO MATCH YOUR IDEAS

Make use of efficiently illuminated objects to communicate your advertising message, make it be seen even in dim light surroundings. With the achte light box system we offer you a way of advertising your products that could so far only be reached at enormous cost, if at all.

Achte transparency light boxes don't have a disturbing frame at the front, they offer almost any technical variation and, above all, can be supplied in any size required. Our range, covering everything from flat LED light boxes to shining bright light boxes with fluorescent tubes, will perfectly communicate your ideas. Create a space with complex 3D-designs – like cubes, arched and rounded light walls or cylinders – we will implement your creations professionally, quickly and economically.

We can gladly share with you first class customer references where we've been used for fairs, events, presentations and in showrooms.
